11 FEB 1985

MEMORANDUM FOR: Deputy Director for Administration

VIA: Daniel C. King
Director of LogisticsFROM:
Chief, Procurement Management Staff, OL

SUBJECT: Outside Activity - AFCEA

1. Approval is requested for a presentation by the undersigned at a "Basic Orientation in Intelligence" course run by the Armed Forces Communications and Electronics Association (AFCEA) Professional Development Center. The presentation would be on 27 February 1985 at the BDM Corporation in McLean, Virginia, and would involve participation with a representative of the National Security Agency (NSA) in a panel discussion on how NSA and the Central Intelligence Agency go about contracting with industry for goods and services. Information to be provided would approximate that in the attached speech which was given to the Security Affairs Support Association in 1981 by Dan King and the undersigned.

2. I know little about AFCEA except that Jack Blake, Ray Cline, and other well-known intelligence executives are involved with it. Jack Blake describes AFCEA as an interim organization between contractors and the Intelligence Community intended to facilitate the interface. I see benefit in helping contractors understand how to make their first contact with us and accurately presenting the facts.

3. Brochures are attached to assist you in evaluating this request. The covering letter mentions an honorarium and travel expenses. I have no idea what this involves but will take care that this is handled in accordance with applicable regulations.

4. This matter was discussed briefly with James McDonald on 8 February.
